

# Thien Gia Phuc Bulk Bags

Thien Gia Phuc is a manufacturer of Flexible Bulk Containers commonly called bulk bags. We custom manufacture any style of bulk bag to fit any application including U-panel, circular, baffed, funnel style, full bottom discharge, Type D, sift proof, U.N. certified, and groundable bags. TGP lives up to our name and all of our bulk bags are Built with Integrity.

## Bulk Bag Styles

TGP Bulk bags can be FDA approved, and made from woven polypropylene fabric that is certified safe for food packaging.

The fabric can be uncoated allowing the bag to breathe or can be coated making the bag non breathable. A polyethylene liner may be inserted into the bag to decrease the moisture vapor transfer rate.

### Top Options

Fill spout top

Duffle top

Open top

### Bottom Options

Discharge chute

Discharge chute flap

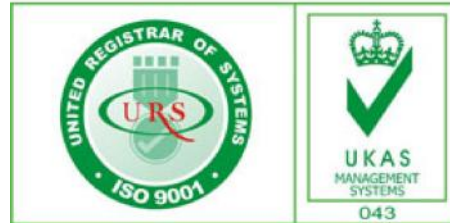

Solid bottom

## TGP offers additional features:

URS is a member of Registrar of Standards (Holdings) Ltd.

TGP assures top quality bags and our line of products are sure to fit your transportation needs.

## Food Grade Bulk Bags

TGP food grade bulk bags are FDA and AIB approved

American Institute of Baking's Audit Programs hold the facilities they inspect to the highest of standards. TGP food grade bulk bags are manufactured to meet the American Institute of Baking Consolidated Standards for Packaging Facilities.

This allows your customers the confidence that their quality food products are packaged in a safe contaminate free packaging.

## Baffled Bulk Bags

TGP baffled bulk bags are equipped with interior reinforcement baffles to hold the filled bag in a more stable shape than the usual rounded-out shape of standard bulk bags. This added stability allows for more efficient stacking, which helps utilize space in your warehouse, truck, railcar, and overseas container effectively cutting down on shipping costs. The baffle bag is also very stable with little to no overhang on pallets allowing easier loading and unloading, virtually eliminating damaging scraping while in transit.

## Why should you choose Bulk Bags?

Bulk Bags are reusable, they are environmentally friendly and significantly reduce packaging costs.

- Lower packaging costs
- Reduced labor
- High speed packaging
- Stackable
- No pallets required
- Store easily when not in use
- Versatile
- Custom built for your unique needs

## What can I use a Bulk Bag for?

Some of the most common uses for bulk bags are:

Chemicals, Cement, Food, Agricultural, Construction, Resins, Polymer and other Dry Flowing Products.

TGP manufactures in Ho Chi Minh City, Vietnam, We also own and operate a facility in south east Asia with the highest quality standards.

TGP can meet all of your domestic and imported product needs.
